Currently Chinese students in Korea compose one the largest overseas student community in Korea. In this paper, we would like to highlight the evolution of Chinese students in Korea and their adaptation to Korean society.

They are working as crucial bridge of businesses between two countries and it is expected that their role will be enhanced with time.

We will divide students group into two; one group of students near Seoul and another group away from Seoul. Based on this, we will scrutinize their differences of attitude and similarities. For this, we will interview them to evaluate in more scientific way. If it is possible, we may propose ways of enhancing efficiency of studies of Chinese students in Korea.
